DATA STRUCTURES A data structure is an arrangement of data in a computer's memory or even disk storage. An example of several common data structures are arrays, linked lists, queues, stacks, binary trees, and hash tables. Algorithms, on the other hand, are used to manipulate the data contained in these data structures as in searching and sorting.

Advance Data Structure Lab

unlike linked list it is expensive to insert and delete elements in the array. One can't double or triple the size of array as it occupies block of memory space. In linked list. each element in list contains a field, called a link or pointer which contains the address of the next element.
