CLIPS Rule Based Programming Language download ...

Rules-Based Machine Translation (RBMT) systems were the first commercial machine translation systems and are based on linguistic rules that allow the words to be put in different places and to have different meanings depending on the context. RBMT technology applies to large collections of linguistic rules in three different phases: analysis, transfer, and generation.

What is Rules-Based Machine Translation (RBMT ...

Rule-based machine translation relies on countless built-in linguistic rules and millions of bilingual dictionaries for each language pair. The software parses text and creates a transitional representation from which the text in the target language is generated. This process requires extensive lexicons with morphological, syntactic, and semantic information, and large sets of rules.

What is Machine Translation? Rule Based vs. Statistical ...

The rules of language are known as subsidiary rules. The ejusdem generis rule literally means of the same kind. It applies where specific words are followed by general words and means that the general words are limited to things of the same kind.
