The activation of the pagination and the number of elements per page can be configured from: the server-side (globally or per resource) the client-side, via a custom GET parameter (disabled by default) When issuing a GET request on a collection containing more than 1 page (here /books), a Hydra collection is returned.

API Platform: Pagination

Here I will explain Client side pagination using JQuery in Asp.net MVC. In this example, we perform all the operation using Ado.Net and Stored procedure. For full Source code and step by step ...

Client Side Paging Using JQuery in Asp.net MVC

In the new release of WCF Data Services, we get a new paging feature which enables server side paging. Using this method or combining it with client side paging extends the capabilities of WCF Data Services. The use of the server side paging is very easy – just configure the service.

Using Paging in WCF Data Services - CodeProject

Client-side paging. In client-side paging, the client decides how many records it wants to load and asks the server that many records. That is achieved by using \$skip and \$top query options. Server-side paging. In Server side paging, even if the client requests all the records, the server will only return a portion of the results, but provide a “next link” information, which can be followed to get the next portion and so on. This we can achieve by using \$skiptoken query options.

\$Skiptoken System Query Option In SAP ODATA | SAP Blogs

In server-driven paging, the client asks for a collection of entities and the server sends back partial results as well as a nextlink to use to retrieve more results. The nextlink is an opaque link which may use \$skiptoken to store state about the request, such as the last read entity.

Use \$skiptoken for server side paging - OData | Microsoft Docs

In the case of client side paging, where the client controls how many values are retrieved, there can be issues when the client tries to retrieve a large amount of data from the backend. To shield the server from such unintentional “Denial of Service attacks”, you can use server side paging.

Implementing Query Options In ODATA - 123techguru.com ...

Client side paging vs. server side paging Paging in general happens on the server, however the LLBLGen Pro runtime framework switches to client-side paging at the datareader level if the paging query can't be generated without causing errors on the server. This happens if a DISTINCT violating
