A Condition that tests whether a member of a hierarchy has the specified hierarchical relationship to itself or to another member of the hierarchy.

HierarchicalCondition (Oracle OLAP Java API Reference)

Throughout this study the reference dataset is always a completely independently generated dataset, from a different study and in several cases using a different scRNA-seq platform. Reference cell types are hierarchically clustered into a classification tree which guides the cell type identification process (Figure 1A). The classification tree aids cell type identification but is not intended as a recapitulation of cell taxonomy.
