Abstract. Preference learning refers to the task of learning to predict (contextualized) preferences on a collection of alternatives, which are often represented in the form of an order relation, on the basis of observed or revealed preference information.

Preference Learning | SpringerLink

The topic of preferences is a new branch of machine learning and data mining, and it has attracted considerable attention in artificial intelligence research in previous years. It involves learning from observations that reveal information about the preferences of an individual or a class of individuals. Representing and processing knowledge in terms of preferences is appealing as it allows ...
