Agile Product Management Scrum Mega

With increased competition in many industries and customers demanding new innovations, many organizations have adopted an agile product management approach. Applying the agile framework to product management lets companies release regular updates of their products and learn with each small update what resonates with users, rather than having to build the entire product first and then release it to the market. What is Scrum? Agile is more of a mindset than any specific development rules or steps.

Scrum for Agile Product Management Teams | Definition and ...

The Scrum master keeps track of and organizes the Scrum events (the sprint, the daily scrums, the review and the retrospective) and the artefacts (product backlog, spring backlog, and increments.) This role requires a good understanding of leadership techniques, as you'd be leading the scrum team across the entire development cycle.

...

First, you couldn't do Agile without adopting the Agile Process, which in Mega-Bureaucracy-speak meant "we're doing a very specific flavor of scrum". This meant morning standups were mandated. You needed a scrum-master on the team, which would be a resource drawn from the project management office, and well, they'd also pull double duty as the project manager.

Mega-Agile - The Daily WTF

In Agile Product Management with Scrum, leading Scrum consultant Roman Pichler uses real-world examples to demonstrate how product owners can create successful products with Scrum. He describes a broad range of agile product management practices, including making agile product discovery work, taking advantage of emergent requirements, creating the minimal marketable product, leveraging early customer feedback, and working closely with the development team.
