Issues and Strategies for Second Language Classrooms

Cambridge University Press

This text is a self-contained, student-centered methods text that connects reading theory to practical classroom activities. The paperback edition, ideal for introductory courses on the teaching of second language reading, connects reading theory to practical classroom activities. Teaching Readers (Not Reading)

Moving Beyond Skills and Strategies to Reader-Focused Instruction *Guilford Publications*

Reading instruction is too often grounded in a narrowly defined "science of reading" that focuses exclusively on cognitive skills and strategies. Yet cognition is just one aspect of reading development. This book guides K-8 educators to understand and address other scientifically supported factors that influence each student's literacy learning, including metacognition, motivation and

engagement, social-emotional learning, self-efficacy, and more. Peter Afflerbach uses classroom vignettes to illustrate the broad-based nature of student readers' growth, and provides concrete suggestions for instruction and assessment. The book's utility is enhanced by end-of-chapter review questions and activities and a reproducible tool, the Healthy Readers Profile, which can be downloaded and printed in a convenient 8 1/2" x 11" size.

The Book Whisperer

Awakening the Inner Reader in Every Child *John Wiley & Sons*

Donalyn Miller says she has yet to meet a child she couldn't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional

approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. The book includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

Reading Projects Reimagined

Student-Driven Conferences to Deepen Critical Thinking *Heinemann Educational Books*

Veteran teacher and author Dan Feigelson raises an important question about the larger goal of reading instruction: while it's our job as reading teachers to introduce students to new ideas and comprehension strategies, shouldn't we also teach them to come up with their own ideas - without teacher prompting? In Reading

Projects Reimagined, Feigelson shows us how conference-based, individual reading projects help students learn how to think for themselves. He provides a concrete picture of what reading projects look and sound like in the classroom with: step-by-step guidelines on how to conduct a productive conference categories to help teachers narrow down possible directions a conference could go examples of student work and teacher-student dialogue. When readers go beyond simple comprehension questions to extend their own ideas, they're on their way to becoming independent, critical thinkers who can read any text with depth and thoughtfulness. Praise for Reading Projects Reimagined: "Dan Feigelson is one of our shrewdest and most versatile thinkers in the field of literacy, a guy who can draw from his experiences as classroom teacher, staff developer, principal, and superintendent. In this fascinating book, Dan gives a new vision for the reading conference in which teachers can help students name their own ideas, and use them as tools for deeper comprehension."-Ralph Fletcher "This book contains some of the best writing about conferring with children that I've read."-Carl Anderson If you have ever wondered how to bring more substance, more gravitas, to reading

conferences, this book will provide you with an array of possibilities. Dan Feigelson is absolutely clear that he is not offering a set of scripts for conferences; instead he shows us how to help each child develop a sense of the possible."-Ellin Keene

"In *Reading Projects Reimagined*, Dan Feigelson reminds us of a radical and grounding premise, that a truly effective reading conference, one that can change a reading life, prioritizes the reader, not the standards or test prep. Dan shows us how to shine a light on children's words and intentions in ways that can increase their engagement with texts and inspire investment in their own text-based ideas."-Kathy Collins

Building Communities of Engaged Readers

Reading for pleasure
Routledge
Reading for pleasure urgently requires a

higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and

demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities.

Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy

field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young people's enjoyment of and attainment in reading.

The Knowledge Gap

The hidden cause of America's broken education system--and how to fix it
Penguin

The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of

the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars*, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But *The Knowledge Gap* isn't

just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

The Latinist: A Novel

W. W. Norton & Company

A contemporary reimagining of the Daphne and Apollo myth, *The Latinist* is a page-turning exploration of power, ambition, and the intertwining of love and obsession. Tessa Templeton has thrived at Oxford University under the tutelage and praise of esteemed classics professor Christopher Eccles. And now, his support is the one thing she can rely on: her job search has yielded nothing, and her devotion to her work has just cost her her boyfriend, Ben. Yet shortly before her thesis defense, Tessa learns that Chris has sabotaged her career—and realizes

their relationship is not at all what she believed. Driven by what he mistakes as love for Tessa, Chris has ensured that no other institution will offer her a position, keeping her at Oxford with him. His tactics grow more invasive as he determines to prove he has her best interests at heart. Meanwhile, Tessa scrambles to undo the damage—and in the process makes a startling discovery about an obscure second-century Latin poet that could launch her into academic stardom, finally freeing her from Chris's influence. A contemporary reimagining of the Daphne and Apollo myth, *The Latinist* is a page-turning exploration of power,

ambition, and the intertwining of love and obsession.

Building Communities of Engaged Readers

Reading for pleasure

Routledge

Reading for pleasure urgently requires a higher profile to raise attainment and increase children's engagement as self-motivated and socially interactive readers. Building Communities

of Engaged Readers highlights the concept of 'Reading Teachers' who are not only knowledgeable about texts for children, but are aware of their own reading identities and prepared to share their enthusiasm and understanding of what being a reader means. Sharing the processes of reading with young readers is an innovative approach to developing new generations of readers. Examining the interplay between the 'will and the skill' to read, the book distinctively details a reading for pleasure pedagogy and demonstrates that reader engagement is strongly influenced by relationships between children, teachers, families and communities.

Importantly it provides compelling evidence that reciprocal reading communities in school encompass: a shared concept of what it means to be a reader in the 21st century; considerable teacher and child knowledge of children's literature and other texts; pedagogic practices which acknowledge and develop diverse reader identities; spontaneous 'inside-text talk' on the part of all members; a shift in the focus of control and new social spaces that encourage choice and children's rights as readers. Written by experts in the literacy field and illustrated throughout with examples from the project schools, it is essential reading for all those concerned with improving young

people's enjoyment of and attainment in reading.

A Close Look At Close Reading

Teaching Students to Analyze Complex Texts, Grades K-5 *ASCD*

The Common Core State Standards have put close reading in the spotlight as never before. While elementary school teachers are certainly willing to teach students to closely read both literary and informational text, many are wondering what, exactly, this involves. Is there a process to follow? How is close reading different from guided

reading or other common literacy practices? How do you prepare students to have their ability to analyze complex texts measured by Common Core assessments? Is it even possible for students in grades K-5 to “read to learn” when they’re only just learning to read? Literacy experts Diane Lapp, Barbara Moss, Maria Grant, and Kelly Johnson answer these questions and more as they explain how to teach young learners to be close readers and how to make close reading a habit of practice in the elementary classroom. Informed by the authors’ extensive field experience and enriched by dozens of real-life scenarios and downloadable tools and templates, this

book explores *Text complexity and how to determine if a particular text is a right for your learning purposes and your students. * The process and purpose of close reading in the elementary grades, with an emphasis on its role in developing the 21st century thinking, speaking, and writing skills essential for academic communication and required by the Common Core. * How to plan, teach, and manage close reading sessions across the academic disciplines, including the kinds of questions to ask and the kinds of support to provide. * How to assess close reading and help all students—regardless of linguistic, cultural, or academic

background—connect deeply with what they read and derive meaning from a complex text. Equipping students with the tools and process of close reading sets them on the road to becoming analytical and critical thinkers—and empowered and independent learners. In this comprehensive resource, you'll find everything you need to start their journey.
