You would create a time series in pretty
much the same way that you would
enter data for any purpose in Excel.

What makes a time series different than other data series is that the values correspond to different points in time. For example, suppose you wanted to track the number of students in a particular class from semester to semester over a number of years. Then you would create a time series for enrollment. Let's open a blank Excel spreadsheet and fill in some data!

Understanding Time Series Forecasting in Excel - Magoosh ...

A time series is a sequence of observations $y_1, \dots, y_n$. We usually think of the subscripts as representing evenly spaced time intervals (seconds, minutes, months, seasons, years, etc.). For those of you doing financial analysis, the Deriscope website provides access to a

wealth of low cost financial data to Excel.
