Bacteria Based Self Healing Concrete

The Sporosarcina Pasteurii bacteria used in silica fume concrete, it was found that there is an improvement in strength and durability of silica fume concrete through self-healing effect . Bacillus Sphaericus bacteria was used in concrete to check the surface treatment and the results reveal that bacterial carbonate precipitation can be used as an alternative surface treatment for concrete [18] .

Bacteria based self healing concrete - A review ...

Self-healing Concrete is also called Bio concrete or Bacterial Concrete. It’s specially made to increase the lifespan or the durability of concrete structure by the self-healing action of that concrete. A Bacterial genus named Bacillus is mixed with the healing agent. The bacteria are capable of surviving in an extremely alkaline environment and can dormant up to 200 years.
