The UL Class 350 2-hour fire rating means that when exposed to external temperatures of over 1700°, the internal temperature of the safe will not exceed 350° for at least 2 hours – also designed

When a 1 hour rated safe isn't enough, the next step up is the UL Class 350 2-hour fire rating. Much like the 1 hour rating, this means that when the Sentry or FireKing safe is exposed to external temperatures of over 1700° F, the internal temperature of the safe will not exceed 350° F for at least 2 hours.

With FireKing's UL-2 Hour Fire and Impact Rated File Cabinets, you'll receive twice the asset protection. Each and every 2 Hour fire rated file cabinet is produced with Thermocell II, a proprietary insulation which provides added protection from fire and prevents internal temperatures from ever exceeding 350 degrees in 1700 degree heat.

USG provides resources here for our UL wall assemblies for seamless integration into any construction project. These wall assembly files are used for planning and estimation purposes for many UL wall types, such as fire-rated wall assemblies.
