Animal - Animal - Evolution and paleontology: All the adaptations in the living world have been produced by

natural selection. This selection acts continuously, on many levels and time scales. Thus, an animal may become well adapted to an ecological niche that then disappears, forcing the animal either to evolve rapidly to fill another or, more likely, to become extinct.

Animal - Evolution and paleontology | Britannica

The most rapid diversification and evolution of animal species in all of history occurred during the Cambrian period of the Paleozoic Era, a phenomenon known as the Cambrian explosion. Until recently, scientists believed that there were only very few tiny and simplistic animal species in existence before this period.

Evolution Of Animal Diversity Study Guide Answers

Animal Evolution. Life on Earth didn't start out with animals. All life on earth started from the primordial ooze, where inorganic molecules produced organic molecules, organic molecules formed bigger molecules, and, eventually organic molecules hung together inside membranes. That led to cell-like structures and then cells. Simpler cells

led to cells that are more complex.

Animal Evolution Help | Animal Evolution and Diversity ...

The diverse appearance of animals is mostly superficial; the bewildering variety of known forms, some truly bizarre, can be assorted among a mere half-dozen basic body plans. These plans are established during the embryonic stages of development and limit the size and complexity of the animals. Symmetry, number and relative development of tissue layers, presence and nature of body cavities, and several aspects of early development define these fundamental modes of organization.

Animal Evolution and Diversity Introduction. Animal diversity is so much more than dogs and cats and humans. It is a lot more than what is in the zoo or even on The Discovery Channel. Movies only show the big, impressive ones like man-eating tigers and man-eating sharks. This is too bad, because movie monsters don't come close to the things that are real.
