Mammography and Beyond: Developing Technologies for the ...

X-ray mammography screening is the current mainstay for early breast cancer detection. It has been proven to detect breast cancer at an earlier stage and to reduce the number of women dying from the disease. However, it has a number of limitations. These current limitations in early breast cancer detection technology are driving a surge of new technological developments, from modifications of x-ray mammography such as computer programs that can indicate suspicious areas, to newer methods of ...

Mammography and Beyond: Developing Technologies for the ...

Issued by the National Cancer Policy Board of the Institute of Medicine and the Division of Earth and Life Studies of the National Research Council, Mammography and Beyond underscores the role of early detection of breast cancer in facilitating intervention at a stage when treatment may be most effective. As noted by the authors, this seemingly simple concept belies a number of complexities, not the least of which is the need to understand the basic biology of breast cancer.
