A system of linear equations of the form $Ax = b$ for $b \neq 0$ is called inhomogeneous. A homogeneous system is just a system of linear equations where all constants on the right side of the equals sign are zero. A homogeneous system always has the solution $x = 0$. This is called the trivial solution.

If the solution set is a range of numbers, as the one we looked at above is, we will use something called set builder notation. Here is the solution set for the inequality we looked at above. $\left\{z\mid z\geq-5\right\}$ This is read as : "The set of all z such that z is greater than or equal to -5 ". Most of the inequalities that we will be looking at will have simple enough solution sets that we often just shorthand this as,
