Markowitz portfolio selection Modern portfolio theory (MPT) is a method for constructing a portfolio of securities. It was introduced by Harry Markowitz in the early 1950s. Markowitz's portfolio selection approach allows investors to construct a portfolio that gives investors the best risk/return trade-off available.

**Markowitz portfolio
selection - Breaking
Down Finance**

Harry M. Markowitz is credited with introducing new concepts of risk measurement and their

application to the selection of portfolios. He started with the idea of risk aversion of average investors and their desire to maximise the expected return with the least risk.

**Markowitz Theory of
Portfolio
Management |
Financial Economics**

In finance, the Markowitz model - put forward by Harry Markowitz in 1952 - is a portfolio optimization model; it assists in the selection of the most efficient portfolio by analyzing various possible portfolios of the given securities. Here, by choosing securities that do not 'move' exactly together, the HM model shows investors how to reduce their risk.

Markowitz model - Wikipedia

There's no such thing as the perfect investment, but crafting a strategy that offers high returns and relatively low risk is priority for modern investors. While this hallmark seems rather straightforward today, this strategy actually didn't exist until the latter half of the 20th century. In 1952, an economist named Harry Markowitz wrote his dissertation on "Portfolio Selection", a paper that contained theories which transformed the landscape of portfolio management—a paper which ...

Harry Markowitz (1927-) is a Nobel Prize winning economist who devised the modern portfolio theory, introduced to academic circles in his article, "Portfolio Selection," which appeared in the...

Harry Markowitz - investopedia.com

Markowitz' portfolio selection model makes the general assumption that investors make their investment decisions based on returns and the risk spread. For

most investors, the risk undertaken when purchasing a security is that they will receive returns that are lower than what was expected.

Harry Max Markowitz is an American economist, and a recipient of the 1989 John von Neumann Theory Prize and the 1990 Nobel Memorial Prize in Economic Sciences. Markowitz is a professor of finance at the Rady School of Management at the University of California, San Diego. He is best known for his pioneering work in modern portfolio theory, studying the effects of asset risk, return, correlation and diversification on

probable investment portfolio returns.

Harry Markowitz - Wikipedia

Harry Markowitz developed a theory, also known as Modern Portfolio Theory (MPT) according to which we can balance our investment by combining different securities, illustrating how well selected shares portfolio can result in maximum profit with minimum risk. He proved that investors who take a higher risk can also achieve higher profit.
