The Future of Big Data: Smart Data-Driven Business

Big data and analytics have climbed to the top of the corporate agenda.

Together, they promise to transform the way companies do business, delivering the kind of performance gains last seen in the 1990s, when organizations redesigned their core processes.

Three keys to building a data-driven strategy

That experience is one example of how companies are using big data to create a better experience and more effectively target buyers based on previous behaviors. The sheer amount of trackable activity that exists today has begun to make data collection and analysis a much more manageable task,

and the impact is in the numbers.
