The book will help you: Plan and conduct class sessions in which students are actively engaged, no matter how large the class is. Make good use of technology in face-to-face, online, and hybrid courses and flipped classrooms. Assess how well students are acquiring the knowledge, skills, and conceptual understanding the course is designed to teach. Help students develop expert problem-solving skills and skills in communication, creative thinking, critical thinking, high-performance teamwork, and self-directed learning. Meet the learning needs of STEM students with a broad diversity of attributes and backgrounds. The strategies presented in Teaching and Learning STEM don't require revolutionary time-intensive changes in your teaching, but rather a gradual integration of traditional and new methods. The result will be continual improvement in your teaching and your students' learning.
