Laser Hair Removal Devices Bc

Currently, lasers used for skin
 resurfacing, skin lesions and hair
 removal in BC operate with high
 emission levels and are therefore
 designated in the highest hazard classes

(Class 3b & 4). These classifications indicate that the laser radiation emitted from these devices is a hazard to unprotected eyes or skin from exposure to the direct beam.

Laser Hair Removal in Vancouver BC | YellowPages.ca™

Both Laser and IPL Hair Removal use light to cause thermal damage to the hair follicle. IPL and laser use specific wavelengths of light that are optimum for absorption by the melanin pigmentation in the hair, yet at the same time minimizing the trauma to the skin. IPL differs from laser by being able to deliver energy at optimum wavelengths for a variety of skin tones. This allows us to effectively treat a greater range of skin tones with the same device.
