Java is the #1 programming language and development platform. It reduces costs, shortens development timeframes, drives innovation, and improves application services. With millions of developers running more than 51 billion Java Virtual Machines worldwide, Java continues to be the development platform of choice for enterprises and developers.

Java Software | Oracle

The ServerSocket class is used to implement a server program. Here are the typical steps involve in developing a server program: 1. Create a server socket and bind it to a specific port number. 2. Listen for a connection from the client and accept it. This results in a client socket is created for the connection. 3.

Java Socket Server Examples (TCP/IP)

Download the Minecraft: Java Edition server. Want to set up a multiplayer server? Please note: This server setup is only compatible with Minecraft: Java Edition. If you want to run a Minecraft multiplayer server by yourself things get kind of involved (see this wiki article for

a tutorial). First make sure you can use `java` from the command line.
