From the reviews: "Real World Ecology begins by examining the limitations of many of the older ecological methods for interpreting large scale systems of complex spatial and temporal variability.

The editors point out the variety of new techniques that have been proposed, with varying degrees of success. ...

Real World Ecology - Large-Scale and Long-Term Case ...

Compositional multistability is widely observed in multispecies ecological communities. Since differences in community composition often lead to differences in community function, understanding compositional multistability is essential to comprehend the role of biodiversity in maintaining ecosystems. In community assembly studies, it has long been recognized that the order and timing of species migration and extinction influence structure and function of communities.
