Classifications History. Ungulata is a clade (or in some taxonomies, a grand

order) of mammals. The two orders of ungulates were the Perissodactyla (odd-toed ungulates) and Artiodactyla (even-toed ungulates). Hyracoidea (hyraxes), Sirenia (sea cows) (dugongs and manatees) and Proboscidea (elephants) were in the past included in a superorder called Paenungulata which was grouped with the ungulata.

Ungulate - Wikipedia

The ram's horn squid has never been officially recorded in its natural habitat despite their small shells being a common find on beaches all over the world. Via Wikipedia: "The shell of Spirula is extremely light, very buoyant, surprisingly durable; it commonly floats ashore onto tropical beaches (sometimes even temperate beaches) all

over the world.
