The Introduction to Embedded Linux Workshop dedicates more than 50% of classroom time to hands-on lab exercises. Each lecture is immediately followed by a lab exercise in which the concepts of the lecture are applied to a real embedded system. The workshop labs are tested on the AM335x Starter Kit (<\$200), and every lab exercise except for labs 09 and 10 will also run on the low-cost Beaglebone development board (<\$100).
