Current research uses a translational systems biology approach to study the impact of antigenic diversity on immune

evasion, transmission, and virulence in setting of declining malaria transmission. We study the development of genotype-specific and genotype-transcendent immunity and assess the effect of specific persisting genotypes on neutralizing humoral immune responses and their transmission potential in the mosquito vector.

Translational systems biology of inflammation. - Abstract ...

Tens of thousands of modified peptides can be analysed in a few hours by using affinity reagents for phosphopeptides and other post-translational modifications. While insight into the higher-order structure of proteins and complexes is provided by using crosslinking reagents or deuterated water in hydrogen-deuterium exchange experiments.
