Physical Science Paper 2 Intermolecular Forces ...

Intermolecular Forces. The easiest kind to understand are permanent dipole-permanent dipole interactions. These occur between polar molecules. A molecule is polar when there is an uneven distribution of electron density. This occurs in a bond when the atoms at each end have a different pull on the electron pair.

Intermolecular Forces - A-Level Chemistry

Be sure that students understand that molecules often have multiple types of intermolecular forces at the same time. For example, all molecules experience London dispersion forces, even if they also

have other types of intermolecular forces. If molecules of a substance exhibit dipole-dipole interactions, they also experience London dispersion forces, and if molecules experience hydrogen bonding, they also have dipole-dipole interactions (of which hydrogen bonding is a particularly strong ...
