Software Architecture & Design Introduction - Tutorialspoint

Software architecture refers to the fundamental structures of a software system and the discipline of

creating such structures and systems. Each structure comprises software elements, relations among them, and properties of both elements and relations. The architecture of a software system is a metaphor, analogous to the architecture of a building. It functions as a blueprint for the system and the developing project, laying out the tasks necessary to be executed by the design teams. Software architecture is the fundamental organization of a system, represented by its components, their relationships to each other and to the environment, and the principles that determine the design and evolution of the system.
