electrochemistry which is our first real example of modern analytical chemistry. By that we mean that plenty of scientists do electrochemistry today because it is often the best way to solve certain problems in chemical analysis like understanding corrosion (rust).

Chapter 21: ELECTROCHEMISTRY TYING IT ALL TOGETHER

About electrochemistry questions. There are many properties of matter, which are related to their surface. Such properties become predominant if the substance is in finely divided form or its surface is rough. Under these conditions the surface area increases enormously and large amount of material is present in the surface. The surface related properties of matter are adsorption, colloidal state and emulsions.
