Anatomy and Physiology 2: Unit 4--Digestive System and ...

The major organs of the digestive system are the stomach and intestine. The upper gastrointestinal tract consists of the esophagus, stomach, and duodenum. The lower gastrointestinal tract includes the small intestine and the large intestine. Digestive juices are produced by the pancreas and the gallbladder.

Overview of the Digestive System | Boundless Anatomy and ...

In the duodenum, digestive secretions from the liver, pancreas, and gallbladder play an important role in digesting chyme during the intestinal phase. In order to neutralize the acidic chyme, a hormone called secretin stimulates the pancreas to produce alkaline bicarbonate solution and deliver it to the duodenum.

Diet, Digestion, and Energy Storage Regulation | Boundless ...

Metabolism exists mainly in two states: catabolism and anabolism. The proper interplay between metabolism and digestion is important, when that fails, we have metabolic disorders, such as diabetes or food intolerance. Digestion helps to control the production of hormones such as insulin that has an direct affect in the metabolic states.

The interrelationship of the digestive and endocrine systems is also critical. Hormones secreted by several endocrine glands, as well as endocrine cells of the pancreas, the stomach, and the small intestine, contribute to the control of digestion and nutrient metabolism. In turn, the digestive system provides the nutrients to fuel endocrine function.

23.1 Overview of the Digestive System - Anatomy and Physiology

The digestive system is made up of the digestive tract and other organs that help the body break down and absorb food. Your digestive tract is a long, twisting tube that starts at your mouth, and then involves your oesophagus, stomach, small intestine, large intestine and anus.

digestive system nutrition metabolism anatomy physiology ...

The digestive system is continually at work, yet people seldom appreciate the complex tasks it performs in a choreographed biologic symphony. Consider what happens when you eat an apple. Of course, you enjoy the apple’s taste as you chew it, but in the hours that follow, unless something goes amiss and you get a stomachache, you don’t notice that your digestive system is working.
