In the beginning it is significant to explain the difference between digital image processing and digital image analysis. Image processing can be thought of as a transformation that takes an image into an image, i.e. starting from an image a modified (enhanced [65], [66]) image is obtained. On the other hand, digital image analysis is a transformation of an image into something different from an image, i.e. it produces some information representing a description or a decision.

John Gast's painting "American Progress" is an example of this (it was printed in traveling guides at the time), and – through different displays of symbolism – it portrays Western expansion by Americans as a glorious and righteous thing. In reality, however, expansion may not have been as just as the painting makes it seem.

 I use this image early on in my western history classes for several reasons. First, even students with little experience in talking about visual images find it easy to talk about what they see here. Second, students quickly grasp that although the painting does not convey a realistic representation of actual events, it nonetheless expresses a powerful historical idea about the meaning of ...
