Programming The Universe: A Quantum Computer Scientist ...

Programming the Universe: A Quantum Computer Scientist Takes On the Cosmos is a 2006 popular science book by Seth Lloyd, professor of mechanical engineering at the Massachusetts Institute of Technology. The book proposes that the universe is a quantum computer, and advances in the understanding of physics may come from viewing entropy as a phenomenon of information, rather than simply thermodynamics. Lloyd also postulates that the

universe can be fully simulated using a quantum computer; however

Programming the Universe - Wikipedia

The main thesis of the book is important, though not new. It's that the universe can usefully be regarded as a computer - a quantum computer - whose function is to compute its own behavior. That's sort of a tautology, like saying that a city (for example) computes how it develops.

Programming the Universe: A Quantum Computer Scientist ...

Is the universe actually a giant quantum computer? According to Seth Lloyd, the answer is yes. All interactions between particles in the universe, Lloyd explains, convey not only energy but also information—in other words, particles not only collide, they compute. What is the entire universe computing, ultimately?
