Good Charts: The HBR Guide to Making Smarter, More Persuasive Data Visualizations shows how a good visualization can communicate the nature and potential impact of information and ideas more powerfully than any other form of communication. Net Positive

How Courageous Companies Thrive by Giving More Than They Take *Harvard Business Press*
Runaway climate change and rampant inequality are ravaging the world and costing a fortune. Who will help lead us to a better future? Business. These massive dual challenges—and other profound shifts, such as pandemics, resource pressures, and shrinking biodiversity—threaten our very

existence. Other megatrends, such as the push for a clean economy and the unprecedented focus on diversity and inclusion, offer exciting new opportunities to heal the world, and prosper by doing so. Government cannot do this alone. Business must step up. In this seminal book, former Unilever CEO Paul Polman and sustainable business guru Andrew Winston explode fifty years of corporate dogma. They reveal, for the first time, key lessons from Unilever and other pioneering companies around the world about how you can profit by fixing the world's problems instead of creating them. To thrive today and tomorrow, they argue, companies must become "net positive"—giving more to the world than they take. A net positive company: Improves the lives of everyone it touches, from customers and suppliers to employees and communities, greatly increasing long-term shareholder returns in the process. Takes ownership of all the social and environmental impacts its business model creates. This in turn provides opportunities for innovation, savings, and building a more humane, connected, and purpose-driven culture. Partners with competitors, civil society, and governments to drive transformative change that no single group or enterprise could deliver alone. This is no utopian fantasy. Courageous leaders are already making it real—and the stakes couldn't be higher. With bold vision and compelling stories, Net Positive sets out the principles and practices that will deliver the scale of change and transformation the world so desperately needs. Join the movement now at netpositive.world

Bias Interrupted

Creating Inclusion for Real and for Good *Harvard Business Press*

A cutting-edge, relentless, objective approach to inclusion. Companies spend billions of dollars annually on diversity efforts with remarkably few results. Too often diversity efforts rest on the assumption that all that's needed is an earnest conversation about "privilege." That's not enough. To truly make progress we need to stop celebrating the problem and instead take effective steps to solve it. In *Bias Interrupted*, Joan C. Williams shows how it's done, and, reassuringly, how easy it is to get started. One of today's preeminent voices on inclusive workplaces, Williams explains how leaders can use standard business tools—data, metrics, and persistence—to interrupt the bias that is continually transmitted through formal systems like performance appraisals, as well as the informal systems that control access to career-enhancing opportunities. The book presents fresh evidence, based on Williams's exhaustive research and work with companies, that interrupting bias helps every group—including white men. Comprehensive, though compact and straightforward, *Bias Interrupted* delivers real, practical value in an efficient and accessible manner to an audience that has never needed it more. It's possible to interrupt bias. Here's where you start.

The Harvard Business Review Good Charts Collection

Tips, Tools, and Exercises for Creating Powerful Data Visualizations Harvard Business Press

A good visualization can communicate the nature and potential impact of ideas more powerfully than any other form of communication. For a long time, "dataviz" was left to specialists--data scientists and professional designers. No longer. A new generation of tools and massive amounts of available data make it easy for anyone to create visualizations that communicate ideas far more effectively than generic spreadsheet charts ever could. The Harvard Business Review Good Charts Collection brings together two popular books to help you become more sophisticated in understanding and using dataviz to communicate your ideas and advance your career. In Good Charts, dataviz maven and Harvard Business Review editor Scott Berinato provides an essential guide to how visualization works and how to use this new language to impress and persuade. He lays out a system for thinking visually and building better charts through a process of talking, sketching, and prototyping. In Good Charts Workbook, Berinato extends the usefulness of Good Charts by putting theory into practice. He leads readers step-by-step through several example datasets and basic charts, providing space to practice the Good Charts talk-sketch-prototype process for improving those charts. Examples include a "Discussion Key" showing how to approach the challenge and why. Each challenge focuses on a different, common visualization problem such as simplification, storytelling, creating conceptual charts, and many others. The Harvard Business Review Good Charts Collection is your go-to resource for turning plain, uninspiring charts that merely present information into smart, effective visualizations that powerfully convey ideas.

Mississippi Barking

Hurricane Katrina and a Life That Went to the Dogs Univ. Press of Mississippi

On August 29, 2005, the worst natural disaster in the history of the United States devastated the city of New Orleans and the Gulf Coast of Louisiana and Mississippi. Like many others in America and around the world, Chris McLaughlin watched the tragedy of Katrina unfold on a television screen from the comfort of her living room on Cape Cod in Massachusetts. In the devastation afterwards, almost 2,000 people and an estimated 250,000 animals had perished. Miraculously, many pets did manage to survive. But in the months that followed the hurricane, thousands of them were fending for themselves in the ruins of devastated neighborhoods. They roamed the streets in feral packs or struck out alone. Their plight triggered a grassroots rescue effort unlike any this country had ever seen, and while relief organizations such as the Red Cross were tending to the human survivors, and movie stars and celebrities were airlifting food and endorsing seven-figure checks, a much smaller and meagerly funded effort was underway to save the four-legged victims. With no prior experience in disaster response and no real grasp of the hell that awaited them, scores of animal lovers, including McLaughlin, made their way to the Gulf Coast to help in any way they could. Including photos from four-time Pulitzer Prize-winning photojournalist Carol Guzy, Mississippi Barking spans the course of two years as McLaughlin and others ventured into the wreckage of the Gulf Coast to rescue the animals left behind. McLaughlin tells the moving stories of the people she met along the way, both those who lost everything to the hurricane and those working beside her rescuing and transporting animals away from the neglected, derelict conditions in which they barely survived. Within this story of tragedy and cruelty, suffering and ignorance, Mississippi Barking also bears witness to selfless acts of bravery and compassion, and the beauty and heroics of those who risked everything to save the animals that could not save themselves.
