Before undertaking our Data protection assurance self assessment checklists, you should first determine whether you process personal data as a "controller" or "processor". The definition of these two terms can be found in our Guide to the GDPR. In some instances, you will process personal information as both a controller and a processor.

Data protection self assessment | ICO

What is self-assessment? Self-assessment is a recognized best practice and has been applied to risks and controls for many years. Systematically applied across the organization at the entity and process levels, self-assessment is a pre-determined approach whereby individuals self-review or self-audit the controls for which they are responsible AND communicate the results to appropriate management.

Control self-assessment is a technique developed in 1987 that is used by a range of organisations including corporations, charities and government departments, to assess the effectiveness of their risk management and control processes. A "control process" is a check or process performed to reduce or eliminate the risk of error. Since its introduction the technique has been widely adopted in the United States, European Union and other countries. There are a number of ways a control self-assessmen
