Welding and Metal Fabrication *Cengage Learning*

WELDING AND METAL FABRICATION employs a unique hands-on, project-based learning strategy to teach welding skills effectively and keep students highly motivated. This groundbreaking new text connects each welding technique to a useful and creative take-home project, making exercises both practical and personal for students and avoiding the tedium of traditional, repetitive welding practices. To further enhance the learning process, every welding project includes a set of prints with specifications, like those used in production fabrication shops. This full-featured approach to skill-building reflects the reality of professional welding, where following prints and instructions precisely and laying out, cutting out, and assembling weldment accurately are just as essential as high-quality welding. The included projects are small to conserve materials during the learning process, but detailed instructions and abundant photos and illustrations guide students through a wide range of fabrication skills. Key steps and techniques within the small projects are also linked to larger projects presented at the end of each chapter, enabling students to apply what they have learned by fabricating and welding something more substantial. This thorough, reader-friendly text also

covers relevant academics, such as shop math and measurement, and prepares students for real-world success by having them document their time and materials for each project and prepare a detailed invoice. Metals and How To Weld Them
Colchis Books

The progress of man really started at the time he began to use metals. Until man became the master of metals life was hard, cruel and difficult. Many people seem to think these conditions of life have not changed very much. But do you realize how much easier life is because of metals? Without metals many products we know as common necessities would be impossible, while

other items would be very unsatisfactory substitutes by present-day standards. Without metals our activities would depend on our ability to use wood and stone. Stone axes and hammers may have served the caveman, but they would not meet the needs of skilled craftsmen of today. With only stone and wood available as materials, practically all our modern conveniences would be non-existent. We would not have modern means of transportation—the automobile, ocean liner, train or airplane. Likewise, we would not have modern means of communication—the radio, telephone or television. In fact, we now depend so much on metals it is difficult to think of how we could live without them.

Schaum Pop Favorites, B: The Blue Book *Alfred Music*

The pieces in this series are long-time favorites that have appeal for pianists of all ages. Very carefully correlated to standard piano method levels, each book contains arrangements that are musically appropriate to that level. The arrangements are teacher friendly, even for the teacher who is reluctant to add pop music to the curriculum. And the series is student friendly -- there will be willing practice!
