Value Analysis (VA) is concerned with existing products. It involves a current product being analysed and evaluated by a team, to reduce costs, improve product function or both. Value Analysis exercises use a plan which step-by-step, methodically evaluates the product in a range of areas. These include costs, function, alternative components and design aspects such as ease of manufacture and assembly.

Description. This practical workshop introduces the well-established and powerful Value Analysis/Value Engineering (VA/VE) techniques that are used to improve product value and achieve cost reductions. VA/VE focuses on defining customer requirements before improving the product design, and ensures a balance of cost competitiveness and customer satisfaction by following a structured and quantifiable process.
