Abstract. In Chapter 2, I review a number of classical methods traditionally applied in longitudinal data analysis. First, several descriptive approaches are delineated, including time plots of trend, the paired t-tests, and effect sizes and their confidence intervals. Meta-analysis is also described, with the remaining issues in this technique being discussed.

Advanced Methods. This section presents an overview of advanced geospatial methods, which are used to estimate values at unsampled locations and model the spatial correlation of the data. These methods include varieties of kriging and conditional simulation. Kriging is a spatial interpolation method that allows estimation of values at unsampled locations and provides an estimate of the uncertainty in the interpolated values.

Operations research (British English: operational research) (OR) is a discipline that deals with the application of advanced analytical methods to help make better decisions. Further, the term operational analysis is used in the British (and some British Commonwealth) military as an intrinsic part of capability development, management and assurance. In particular, operational analysis forms part of the Combined Operational Effectiveness and Investment Appraisals, which support British defence ca
