Competition Collusion And Game Theory

Collusion is any explicit or tacit agreement between suppliers in a

market to avoid competition either by price fixing or market sharing. The main aim is to achieve a level of joint profits similar to that which might be achieved by a pure monopolist. Using game theory, explain the potential benefits from collusion between firms. In the game theory example shown in the table, there is an incentive for both firms to collude by charging a high price.

Collusion makes allusion to the cooperation between different firms. This cooperation leads to a restraint of market competition, in any of its forms, which translates into higher profits for the firms in detriment of consumer's welfare. A cartel is an example of firms belonging to the same industry structure which collude to some degree in setting prices and/or output levels.

Collusion is a secret cooperation or deceitful agreement in order to deceive others, although not necessarily illegal, as is a conspiracy. A secret agreement between two or more parties to limit open competition by deceiving, misleading, or defrauding others of their legal rights, or to obtain an objective forbidden by law typically by defrauding or gaining an unfair market advantage is an ...

Collusion - Wikipedia

In game theory, a cooperative game (or coalitional game) is a game with competition between groups of players ("coalitions") due to the possibility of external enforcement of cooperative behavior (e.g. through contract law). Those are opposed to non-cooperative games in which there is either no possibility to forge alliances or all agreements need to be self-enforcing (e.g. through credible ...
