This query works in SQL Server. In MySQL and PostgreSQL, we need to add the word RECURSIVE after the WITH keyword. This will work in MySQL 8.0 when the WITH clause was introduced, but not in earlier versions. You can also use the HierarchyID data type in SQL Server when working with hierarchies. More information on this is available here.

Hierarchical Data in SQL: The Ultimate Guide - Database Star

A common example is calculating a running total in SQL. Let's say we have a table called orders, and that contains an order data and a total amount of the order. And let's say we want to calculate the running total of order amounts, or the "total so far" of orders placed. This total would be added to the previous total and keep increasing.
