Construction hazards are heavily dependent on the type of construction work that is being carried out. For example, working on scaffolding presents entirely different hazards to working with asbestos. The top ten risks and hazards from working on construction sites are: Working at height. Moving objects. Slips, trips, and falls. Noise.

10 Common Construction Hazards & How to Avoid Them

No construction firm today can confidently build a home without this essential document. This was not always the case, however. In the early 1900s and before, builders rarely drew up the kind of detailed specifications found in modern blueprints. House construction was largely a matter of convention, using methods passed down by word of mouth.

About Us - Constructionline

Construction means the building of something. This can mean the building of anything from motorways, to an office block, to a brand new cinema. It is happening all around us, all the time. The bigger the project, the longer it will take to build, so some construction could last a few weeks, and some could last a few years.
