Child psychologists, for example, might look at which child care settings and practices lead to the best

psychological outcomes or they might work with kids to help them develop growth mindsets. Child psychologists may specialize in helping kids cope with specific developmental concerns, or they may take a more general approach.

Child Psychology and Development

THE PSYCHOLOGICAL PERSPECTIVES AS APPLIED TO THE UNDERSTANDING OF CHILDREN'S BEHAVIOUR. The main psychological perspectives as applied to the understanding of the development of children's behaviour are; behaviourist, cognitive, social, psychodynamic, humanistic, cognitive and the developmental perspective. The

behaviourist perspective is the influence of the outer environment on children's behaviour.

Psychological Perspectives on Children's Behaviour

There are five major perspectives that underlie much influential theory and research on child development: " (1) psychoanalytic, which focuses on unconscious emotions and drives; (2) learning, which studies observable behavior; (3) cognitive, which analyzes thought process; (4) contextual, which emphasizes the impact of historical, social, and cultural context; and (5) evolutionary/sociobiological, which considers evolutionary and biological underpinnings of

behavior” (Papalia,

Major Perspectives in Modern Psychology . The early years of psychology were dominated by a succession of these different schools of thought. If you have taken a psychology course, you might remember learning about structuralism, functionalism, psychoanalysis, behaviorism, and humanism—all of which are different schools of psychological thought.

Perspectives in Modern Psychology - Verywell Mind

Below is a summary of the six main psychological approaches

(sometimes called perspectives) in psychology.

Behaviorist Perspective

If your layperson's idea of psychology has always been about people in laboratories wearing white coats and watching hapless rats try to negotiate mazes in order to get to their dinner, then you are probably thinking about behavioral psychology .

However, despite commonalities, understanding of childcare in the four systems varies a great deal. The differences seem to be rooted in local sociocultural, religious and folk healing practices. Remarkably, in all of

them, prescriptions of drugs and behaviour are psychologically grounded and uncannily modern from the perspective of developmental psychology.
