Color and Light

A Guide for the Realist Painter *Andrews McMeel Publishing*

From New York Times best-selling author of the Dinotopia series, James Gurney, comes a carefully crafted and researched study on color and light in paintings. This art instruction book will accompany the acclaimed *Imaginative Realism: How to Paint What Doesn't Exist*. James Gurney, New York Times best-selling author and artist of the Dinotopia series, follows *Imaginative Realism* with his second art-instruction book, *Color and Light: A Guide for the Realist Painter*. A researched study on two of art's most fundamental themes, *Color and Light* bridges the gap between abstract theory and practical knowledge. Beginning with a survey of underappreciated masters who perfected the use of color and light, the book examines how light reveals form, the properties of color and pigments, and the wide variety of atmospheric effects. Gurney cuts through the confusing and contradictory dogma about color, testing it in the light of science and observation. A glossary, pigment index, and bibliography complete what will ultimately become an indispensable tool for any artist. This book is the second in a series based on his blog, gurneyjourney.com. His first in the series, *Imaginative Realism*, was widely acclaimed in the fantastical art world, and was ranked the #1 Bestseller on the Amazon list for art instruction. "James Gurney's new book, *Color and Light*, cleverly bridges the gap between

artistic observation and scientific explanation. Not only does he eloquently describe all the effects of color and light an artist might encounter, but he thrills us with his striking paintings in the process." --Armand Cabrera, Artist

Color Scheme

An Irreverent History of Art and Pop Culture in Color Palettes *Chronicle Books*

Change the way you see color forever in this dazzling collection of color palettes spanning art history and pop culture, and told in writer and artist Edith Young's accessible, inviting style. From the shades of pink in the blush of Madame de Pompadour's cheeks to Prince's concert costumes, *Color Scheme* decodes the often overlooked color concepts that can be found in art history and visual culture. Edith Young's forty color palettes and accompanying essays reveal the systems of color that underpin everything we see, allowing original and, at times, even humorous themes to emerge. *Color Scheme* is the perfect book for anyone interested in learning more about, or rethinking, how we see the world around us.

The Beauty of Everyday Things *Penguin UK*

The daily lives of ordinary people are replete with objects, common things used in commonplace settings. These objects are our constant companions in life. As such, writes Soetsu Yanagi, they should be made with care and built to last, treated with respect and even affection. They should be natural and simple, sturdy and safe - the aesthetic result of wholeheartedly fulfilling utilitarian needs. They should, in short, be things of beauty. In an age of feeble

and ugly machine-made things, these essays call for us to deepen and transform our relationship with the objects that surround us. Inspired by the work of the simple, humble craftsmen Yanagi encountered during his lifelong travels through Japan and Korea, they are an earnest defence of modest, honest, handcrafted things - from traditional teacups to jars to cloth and paper. Objects like these exemplify the enduring appeal of simplicity and function: the beauty of everyday things.

The Designer's Dictionary of Color *ABRAMS*

The Designer's Dictionary of Color provides an in-depth look at 30 colors key to art and graphic design. Organized by spectrum, in color-by-color sections for easy navigation, this book documents each hue with charts showing color range and palette variations. Chapters detail each color's creative history and cultural associations, with examples of color use that extend from the artistic to the utilitarian--whether the turquoise on a Reid Miles album cover or the avocado paint job on a 1970s Dodge station wagon. A practical and inspirational resource for designers and students alike, The Designer's Dictionary of Color opens up the world of color for all those who seek to harness its incredible power.

Los Angeles Modernism Revisited

Houses by Neutra, Schindler, Ain and Contemporaries *Park Publishing (WI)*

Two Austrian-born designers have left their indelible mark on California's residential architecture of the 1930s to 1960s: Richard Neutra (1892-1970) and Rudolph M. Schindler (1887-1953)

combined modern form and inventive construction with new materials to create a truly modern vision of living that remains inspirational to the present day. This new book features twenty famous and lesser known houses from that period, designed by the two pioneers and other architects that were influenced by Neutra's and Schindler's ideas. All are marked by highly economical use and outstanding quality of space, a minimalist aesthetic, and by their ideal adaption to climatic conditions. They are monuments of a period as well as timeless models for contemporary and future architecture. The images by photographer David Schreyer show the buildings in their present state as a commodity of highest quality that can be, and should be, altered to meet today's changed demands to a living space. Andreas Nierhaus's texts, based on interviews, explore the relationship of the present inhabitants to their homes and what they mean to them. Together, the authors offer uniquely intimate insights into a sophisticated way of life still too little known outside California.

2000 Colour Combinations

For Graphic, Web, Textile and Craft Designers *Anova Books*

A rich resource for all designers and artists looking for inspiration and guidance on colour combinations. A huge range of combinations is provided, with full readings for both CMYK (for designers working in print) and RGB (for Web-based and other multi-media designers). As an accomplished colour theorist, the author looks at colour combinations through various elements of colour theory, from hues, values and chroma to working with concepts such

as simultaneous contrast and perceptual transparency. The author has also generated an inspirational series of colour palettes taken from photographs of the world around us, depicting landscapes, urban subjects and everyday objects. The book also contains a selection of work from cutting-edge designers and artists who explain the use of colour in their work and offer exciting new palettes. The colour combinations are rendered as two- and three-colour graphics, stripe studies and more unstructured and complex compositions, all of which showcase the huge variety of effects that can be achieved with colour. This fascinating book reveals the true magic of colour and is an essential reference book for any designer and artist.

Amy Sillman: Faux Pas: Selected Writings and Drawings After 8 Books

Essays on art-making, abstraction, humor, not-knowing, awkwardness and more, from one of New York's most influential and popular painters and teachers Since the 1970s, Amy Sillman--a beloved and key figure of the New York art scene--has developed a singular body of work that includes large-scale gestural paintings blending abstraction with representation, as well as zines and iPad animations. Over the past decade, Sillman has also produced stimulating essays on the practice of art or the work of other artists: for example, reevaluating the work of the abstract expressionists with a queer eye; elaborating on the role of awkwardness and the body in the artistic process; and discussing in depth the role and meanings of color and shape. Featuring

a foreword by Lynne Tillman, *Faux Pas* is the first book to gather a significant selection of Sillman's essays, reviews and lectures, accompanied by drawings, most of them made specially for the book. *Faux Pas* aims at revealing the coherence and originality of Sillman's reflection, as she addresses the possibilities of art today, favoring excess over good taste, wrestling over dandyism, forms over symbols, with as much critical sense as humor. Based in New York City, Amy Sillman (born 1955) is an artist whose work consistently combines the visceral with the intellectual. She began to study painting in the 1970s at the School of Visual Arts and she received her MFA from Bard College in 1995. Her work has been exhibited internationally, including at the Whitney Biennial in 2014; her writing has appeared in *Bookforum* and *Artforum*, among other publications. She is currently represented by Gladstone Gallery, New York.

A Color Notation *e-artnow*

A Color Notation is a book written by Albert Henry Munsell, an American painter, teacher of art, and the inventor of the Munsell color system. Munsell color system is an early attempt at creating an accurate system for numerically describing colors. The Munsell color order system has gained international acceptance and has served as the foundation for many color order systems.

The Secret Lives of Colour *Hachette UK*

THE SUNDAY TIMES BESTSELLER 'A mind-expanding tour of the world without leaving your paintbox. Every colour has a story, and here are some of the most alluring, alarming, and thought-provoking. Very hard painting the hallway magnolia after this inspiring primer.' Simon Garfield *The Secret Lives of Colour* tells the unusual stories of the 75 most fascinating shades, dyes and hues. From blonde to ginger, the brown

that changed the way battles were fought to the white that protected against the plague, Picasso's blue period to the charcoal on the cave walls at Lascaux, acid yellow to kelly green, and from scarlet women to imperial purple, these surprising stories run like a bright thread throughout history. In this book Kassia St Clair has turned her lifelong obsession with colours and where they come from (whether Van Gogh's chrome yellow sunflowers or punk's fluorescent pink) into a unique study of human civilisation. Across fashion and politics, art and war, *The Secret Lives of Colour* tell the vivid story of our culture.
