 a novel called
 Daughter's Keeper that
 I think is excellent. It
 features a woman in
 her 50's or 60's who is

finally settled into a good life with her live-in boyfriend after many years of raising a daughter on her own.

Waldman is expert at her depiction of the complicated mother/daughter relationship. Every interaction between Olivia and Elaine is thick with their history of built up resentment and guilt, an intense love that can often overwhelm and feel burdensome, the competing desires to please and to hurt complicating every moment.

When a small vial arrives in her mailbox from "Lewis Carroll," Ayelet Waldman is at a low point. Her mood storms have become intolerably severe, she has tried nearly every medication possible,

her husband and children are suffering with her. So she opens the vial, places two drops on her tongue, and joins the ranks of an underground, but increasingly vocal group of scientists and civilians successfully using therapeutic microdoses of LSD.
