However, the right side exposure meter (the one we use for manual mode) indicates no exposure compensation. Capturing an image reveals that there's no compensation being applied (as indicated by the histogram). canon manual-mode exposure-compensation auto-iso

canon - Exposure compensation in "manual" mode and auto ...

I assume you mean exposure compensation in Manual with Auto ISO. With my 7D, I just don't worry about it, using evaluative metering which links to the active AF point, I find exposure is close enough that there is enough exposure latitude even with the classic 7D. I just shoot RAW and lift the exposure as needed during post processing.

5D3: No exposure compensation in manual mode. - Canon ...

YES - manual mode, auto ISO & exposure compensation EOS-1D X introduced the notion of being able to use exposure compensation with manual mode and auto ISO. It's something that seems strange to a lot of "older" photographers - manual meant manual - but if you think of manual with

auto ISO as shutter and aperture priority then it makes sense to be able to access exposure compensation.

Manual mode, auto ISO and exposure compensation

The other is to use exposure compensation (and Aperture or Shutter Priority mode). The best solution depends on the situation in which you find yourself, plus the configuration of your camera's dials. For example, with a Canon EOS digital SLR it's easy to apply exposure compensation by moving the Quick control dial on the back of the camera. It's so simple you don't need to take your eye away from the viewfinder.

Manual Mode or Exposure Compensation - Which is Best?

In order to use exposure compensation, you must be in one of the camera modes that utilizes the camera meter, such as aperture priority, shutter priority, program mode, or any other "scene" mode that performs automatic exposure adjustments. Unless one has Auto ISO turned on, exposure compensation will do absolutely nothing in Manual mode. Once the proper camera mode is selected, it will be possible to adjust the brightness of the image by using the exposure compensation feature of the ...

What is Exposure Compensation and How to Use It

Exposure-Compensation shifts how the camera sets the parameters it controls. If it cannot control anything as in manual mode, there is nothing to shift. Most mid-range cameras with manual-controls and a single control-dial use this to their advantage where the EC button switches between controlling aperture and shutter-speed in Manual mode.

Adjust exposure compensation in manual mode? - Photography ...

In most cases, your camera will have a little button with a +/- on it. That is the button you press to change the exposure compensation. While pressing that button, turn the main dial of your camera right or left (by main dial, I am referring to the dial on the top right of your camera, usually next to the shutter release button). That will change the exposure compensation.
