Architecture and the Historical Imagination

Eugène-Emmanuel Viollet-le-Duc, 1814-1879 *Routledge*

Hailed as one of the key theoreticians of modernism, Eugène-Emmanuel Viollet-le-Duc was also the most renowned restoration architect of his age, a celebrated medieval archaeologist and a fervent champion of Gothic revivalism. He published some of the most influential texts in the history of modern architecture such as the *Dictionnaire raisonné de l'architecture française du XIe au XVIe siècle* and *Entretiens sur l'architecture*, but also studies on warfare, geology and racial history. Martin Bressani expertly traces Viollet-le-Duc's complex intellectual development, mapping the attitudes he adopted toward the past, showing how restoration, in all its layered meaning, shaped his outlook.

Through his life journey, we follow the route by which the technological subject was born out of nineteenth-century historicism.

Machining, Joining and Modifications of Advanced Materials *Springer*

This book presents the latest advances in mechanical and materials engineering applied to the machining, joining and modification of modern engineering materials. The contributions cover the classical fields of casting, forming and injection moulding as representative manufacturing methods, whereas additive manufacturing methods (rapid prototyping and laser sintering) are treated as more innovative and recent technologies that are paving the way for the manufacturing of shapes and features that traditional methods are unable to deliver. The book also explores water jet cutting as an innovative cutting technology that avoids the heat build-up typical of classical mechanical cutting. It introduces readers to laser cutting as an alternative technology for the separation of materials, and to classical bonding and friction stir welding approaches in the context of joining technologies. In many cases, forming and machining technologies require additional post-treatment to achieve the required level of surface quality or to furnish a protective layer. Accordingly, sections on laser treatment, shot peening and the production of protective layers round out the book's coverage.

Management, formation et travail en équipe

Pratiques issues du coaching et de l'intelligence collective

De Boeck Supérieur

Comme par hasard, notre système éducatif continue sa descente inexorable dans les palmarès internationaux. Comme par hasard, nos organisations se trouvent confrontées à trouver des économies et des gains de productivité par une quête désespérée de solutions technologiques démesurément complexes dans lesquelles, ensuite, elles se perdent. Comme par hasard, nos sociétés occidentales ont de plus en plus de mal à trouver un modèle social gagnant-gagnant. Et s'il n'y avait pas de hasard ? La plupart des spécialistes de l'Éducation et de la Formation défendent avec acharnement un modèle trop exclusivement fondé sur les connaissances. De même, côté entreprises, on promeut fréquemment en tant que managers des experts qui ont réussi mais qui se trouvent ensuite en difficulté quand il s'agit de sortir de leur expertise initiale. Trop souvent, on construit une équipe sur des talents individuels qu'on se contente ensuite de juxtaposer. Et si nous remettions en cause, tant qu'il

en est encore temps, nos manières cloisonnées de réfléchir ? Enseignants et managers ne sont-ils pas, en grande partie, des praticiens d'un même métier : faire vivre un collectif pour développer des apprentissages au service de la société ? Il existe des réponses simples pour changer la donne. L'auteur les a trouvées en faisant son propre chemin : dans le monde de la formation – jusqu'à créer et diriger une école d'ingénieurs qui forme autrement – puis dans le monde du management, en devenant coach de managers et d'équipes qui fonctionnent différemment. Il convoque également des spécialistes de la pédagogie, du coaching et de l'intelligence collective qui confortent sa réflexion. Il nous invite ainsi à trouver nos propres « clés » pour nous prendre en main sans attendre. L'ouvrage s'adresse tant aux enseignants et formateurs qu'aux managers et dirigeants d'entreprises et d'organisations. Il intéressera également les consultants et les coachs amenés à accompagner des organisations et des équipes, les parents, les bénévoles d'associations et toute personne qui veut dynamiser le travail en équipe.

A History of the French in London

Liberty, Equality, Opportunity

This book examines, for the first time, the history of the social, cultural, political and economic presence of the French in London, and explores the multiple ways in which this presence has contributed to the life of the city. The capital has often provided a place of refuge, from the Huguenots in the 17th century, through the period of the French Revolution, to various exile communities

during the 19th century, and on to the Free French in the Second World War. It also considers the generation of French citizens who settled in post-war London, and goes on to provide insights into the contemporary French presence by assessing the motives and lives of French people seeking new opportunities in the late 20th and early 21st centuries. It analyses the impact that the French have had historically, and continue to have, on London life in the arts, gastronomy, business, industry and education, manifest in diverse places and institutions from the religious to the political via the educational, to the commercial and creative industries.

The Pariahs of Yesterday

Breton Migrants in Paris *Duke University Press*

This work looks at the surge of Bretons who left their homes in Western France in the latter half of the 19th century to live and work in Paris. Portrayed as backward, ignorant peasants they found no welcome until after WWII. Moch positions her work within immigration theory, connecting migration studies to theories about state projects of assimilation and about cultures of inclusion and exclusion.
