It's a flowchart depicting the stages of different activities needed to assess hazards and then develop protection layers to prevent or

mitigate risk. The life-cycle from IEC 61511 focuses on Safety Instrumented Systems (SIS) as one of the critical specialist protection layers that need careful specification, design, testing and maintenance.

IEC 61511 and what it's for - eFunctionalSafety

Clause 17 of IEC 61511 sets the guidelines to follow. We must ensure that the safety integrity required by the SIS is maintained after the modifications made. Functional Safety Assessment (FSA) : An FSA must be done periodically during this phase to ensure that maintenance and operation is carried out in accordance with the assumptions made

during the design.
