Discriminative Clustering For Market Segmentation

The underlying problem setting resembles discriminative clustering, however, existing approaches focus on the prediction of univariate cluster labels. By contrast, market segments encode complex (future) behavior of the individuals which cannot be represented by a single variable. In this paper, we generalize discriminative clustering to structured and complex output variables that can be represented as graphical models.

Deep clustering: Discriminative embeddings for ...

Discriminative clustering is well adapted to the co-segmentation problem for two reasons: first, we can re-use existing features for supervised classification or detection, in particular state-of-the-art architectures based on this-tograms of local features and kernel methods [25]. Re-lying on supervised tools and previous research dedicated

Discriminative

clustering for image co-segmentation

In this paper, we combine existing tools for bottom-up image segmentation such as normalized cuts, with kernel methods commonly used in object recognition. These two sets of techniques are used within a discriminative clustering framework: the goal is to assign foreground/background labels jointly to all images, so that a supervised classifier trained with these labels leads to maximal separation of the two classes.

Discriminative Clustering for Market Segmentation - CORE

Note that although clustering methods can be applied to segmentation problems, the segmentation problem is technically different in that clustering is classically formulated as a domain-independent problem based on simple objective functions defined on pairwise point relations, whereas partitioning may depend on complex processing of the whole input, and the task objective may be arbitrarily defined via training examples with given segment labels.
