STRUCTURAL DESIGN FOR ARCHITECTURE

Structure is the design of forms with different materials that provides various load bearing on horizontal parts or the roof (Falahat et al., 2007). Thus understanding of the structure as well as the architect demands elegance, taste, art and creativity. Structures are architected before being calculated.

The Role of Structure in Creating Architectural Space

The Ever Changing Relationship Between Architecture and Structure Buildings, bridges and large public facilities - part of human history rather than just manmade structures. The space

and image created by these structures - a direct impact on human behavior and feeling of life. From Industrial Revolution, the division between architecture and engineering has existed for nearly two centuries. Never been two parallels - an ever-changing line. From separate to combine and then separate again ...
