Reviewed in the United Kingdom on 21 January 2018. Understanding of the way the genetic code is used to create the foetus and maintain the body has extended considerably over the past decades. The genes are now regarded more as a toolkit for producing proteins

than a blueprint. This book examines the process by which the original strand of DNA in the single cell becomes modified to produce the specialised cells in different parts of the body (why you don't have teeth in your eyes to use the ...
