These provide skeletal support as well as being the site of origin and attachment for the many muscles to act as leverage points. The joints of the upper limb are found between some of these bones and the muscles crossing them allow us to orient these joints. The nerves of the upper limb arise from a complex arrangement of nerve fibers known as the brachial plexus; These nerves give

sensation to our upper limb, as well as innervating the muscles, allowing us to move them at will.
