Start Essbase as a windowed app (I am showing my Windows knowledge here) -- launch essbase.exe as a terminal session, and I *think* the command is ver and you should get the version command back. Also, if you look in Essbase.log, all of that information should pop up whenever Essbase is started.

how would I check which version of Essbase we are running ...

This Oracle Essbase 11.1.2 Bootcamp teaches you the principal techniques and theories to design Essbase block storage databases. Block storage databases are deployed independently for budgeting, forecasting and planning, and as the underlying data storage and analytic engine for Hyperion Planning applications. Learn To: Create block storage databases.

Essbase Training and Certification | Oracle University

For most Essbase applications, user and group security will be a necessity. Here are the steps to set up individual filters and then apply them to a group in Shared Services. First, create a security filter in Essbase: Then click on “New” and add read/write access for the filter: Here is an example of the member specification for filter access:

Essbase Security: Setting Filters to Groups - in2Hyperion

Refresh Planning to Essbase meaning to perform a Refresh from within Planning (Open Application/Manage Application/Manage Databases) If you make metadata changes from within planning, you are making them in the RDBMS not in Essbase. You then have to update the Essbase cubes with those changes. This is done through a refresh.
