Institutional Theory of Momentum and Reversal | The Review ...

Momentum is the tendency of assets with good (bad) recent performance to continue overperforming (underperforming) in the near future. Reversal concerns predictability based on a longer performance history: assets that performed well (poorly) over a long period tend to subsequently underperform (overperform).

An Institutional Theory of Momentum and Reversal

We propose a rational theory of momentum and reversal based on delegated portfolio management. A competitive investor can invest through an index fund or an active fund run by a manager with unknown ability. Following a negative cashflow shock to assets held by the active fund, the investor updates negatively about the manager's ability and migrates to the index fund.

An institutional Theory of Momentum and Reversal

This is a theory paper that incorporates the realities of delegated asset management to help explain why we would see momentum and reversals in asset prices. The main takeaway from the model is that momentum and reversal (i.e. value and momentum investing) can be caused by delegated asset management through the flow of funds.
