Masters degrees in Reproductive Biology equip postgraduates with a working knowledge of the reproductive functions of advanced, multicellular organisms (predominantly humans). This can include looking at mating and fertilisation processes, as well as perinatal development and birth processes.

Masters Degrees in Reproductive Biology

Human fertilization is the union of a human egg and sperm, usually occurring in the ampulla of the fallopian tube. The result of this union is the production of a zygote cell, or fertilized egg, initiating prenatal development. Scientists discovered the dynamics of human fertilization in the nineteenth century.. The process of fertilization involves a sperm fusing with an ovum.
