One of the chapters in IMAGE AND REALITY is devoted to a painstaking critique of "From Time Immemorial", and it is devastating. Peters's scholarship and history appear to be so bad that her book might seem to be an easy mark, maybe even a straw man. But that's what makes so lamentable the reaction in the United States to the exposure of the flimflam. With but a few isolated exceptions, there ...

Images, real and virtual Real images are those where light actually converges, whereas virtual images are locations from where light appears to have converged. Real images occur when objects are placed outside the focal length of a converging lens or outside the focal length of a converging mirror. A real image is illustrated below.

Images, real and virtual

From perception to reality The message common to the photographs is that every image (of the world), be it “natural” or “artificial”, is a construction. This concept of construction and reconstruction also appears in some contemporary theories that examine the process whereby reality arises out of perception in the human consciousness.

From image to reality - CCC Strozzina

Virtual reality refers to a simulation generated by a computer which allows user interaction with the use of special headsets. In simple words, it is an alternative reality created by a computer and the headset allows a person to be immersed in that reality. According to Allied Market Research, the VR content creation market would reach more than \$45 billion by 2026.
